

Tool for the Task - Answer Key

Round 1: Frozen Ground Emergency

Correct Answer: C - Ripper Tooth

Why?

Partially frozen ground requires penetration before excavation can be efficient. A ripper tooth concentrates force into a single hardened point, allowing you to break through frost without excessive vibration.

Round 2: Land Clearing Job

Correct Answer: B - Stump Grinder

Why?

For small-to-medium stumps (6–10 inches) with shallow roots, a stump grinder is faster and cleaner than mechanical extraction.

Round 3: Demolition Cleanup

Correct Answer: A - Hydraulic Thumb

Why?

Sorting mixed debris requires grabbing, lifting, and separating materials. A hydraulic thumb paired with a bucket gives you precise control.
