

✓ What Machine Goes First? - Answer Key

Scenario #1:

Bulldozer – Ideal for clearing brush, pushing debris, and leveling rough terrain.

Scenario #2:

Excavator (with shear/hammer) – Used to safely and efficiently begin demolition by breaking down the structure.

Scenario #3:

Excavator – Best machine for digging trenches for utilities and pipelines.

Scenario #4:

Wheel Loader – Ideal for clearing and moving large volumes of snow quickly across wide areas, especially on open jobsites.
